

BOOKMARK TARGET: INTRODUCTION

Introduction

This page is the target of the first PDF bookmark ("Introduction"). When the user clicks this bookmark in the sidebar, the viewer should scroll here and the bookmark row should receive a full active highlight immediately on the first click.

Between Bookmarks

This page sits between the "Introduction" bookmark (page 1) and the "Chapter 1" bookmark (page 3). When the user scrolls to this page, the "Introduction" bookmark should remain dimly highlighted to indicate the reader is still in that section.

Chapter 1 — Getting Started

This page is the target of the second PDF bookmark ("Chapter 1"). Scrolling to this page should cause the "Introduction" bookmark to lose its highlight and "Chapter 1" to receive the full active highlight.

Between Bookmarks

Another inter-section page, sitting between "Chapter 1" (page 3) and "Chapter 2" (page 5). The "Chapter 1" bookmark should remain dimly visible here.

Chapter 2 — Advanced Topics

This page is the target of the third and final PDF bookmark ("Chapter 2"). All other bookmarks should be un-highlighted when this page is active.

Appendix

A trailing appendix page after all bookmark targets. "Chapter 2" should remain dimly highlighted here since there is no next bookmark to take over.
